

How to Decompile the xob file which uploading in the USB Disk

- 1. Upload the program file of the HMI to the USB disk, and then copy it to the PC (or use the file on the USB disk directly)
- 2. Check out the file that was previously copied from the HMI in the file browser. The original file doesn't have extension file name.

3. Add the extension file name ".xob".

| File and Folder Tasks Image: Constraint of the second se | |

4. Run EasyBuilder Pro, select "Tool / Decompile". The "Decompile" dialog pops up.

5. Click "Browse" button, and find the .xob file that has been added extension name in the previous step.

| Decompile | | | | | | X |
|-------------------|------------------------|-----------------|----------------------|-----------------|---------------------|---|
| XOB file name | : C:\Documents | and Settings\Ro | ockengXP\Desktop\mt8 | 000\001\mt8000. | xob 1 Browse | 5 |
| Project file name | Open | | | | ? | |
| XOB password | Look in: | 001 | D | <u> </u> | ﴾ ₽ ⊞• | - |
