How to backup a project

An EasyBuilder Pro project contains the source project file (*.mtp), and a number of library files (*.flb, *.blb, *.plb, *.slb, *.snd, *.lbl, and *.glb). These can be individually copied to another location for archiving, or to select the Compress/Uncompress option from EasyBuilder Pro's Tools menu.

Step 1.

Click Compress/Uncompress from Tools menu.

Step 2.

The following dialog is displayed. Click "Browse" to select source project for archiving.

Compress/Uncompress project
Compressing C:\EB8000\V3.45\library\button_type11.flb Compressing C:\EB8000\V3.45\library\button_type12.flb Compressing C:\EB8000\V3.45\library\button_type13.flb Compressing C:\EB8000\V3.45\library\button_type14.flb Compressing C:\EB8000\V3.45\library\sound1.snd finished
Compress Source Name : D:\MTP1.mtp Desti. Name : D:\MTP1.cmp Compressing
Uncompress Source Name : Browse Desti. Name : Browse Uncompressing
Exit

All of the files associated with the project are compressed into a file, with a name of the form *.cmp. The compressed CMP file can be properly archived when this step is successfully completed.
