

## Q.

## How to translate EB8000 project to EBPro?

## Δ

The way to translate EB8000 project:

- Step 1. Compress EB8000 project into cmp file
- **Step 2.** Launch EBPro and select Tool/Uncompress.
- **Step 3.** EBPro will show the window below, for Uncompress select the directory of EB8000 cmp file and click [Uncompressing].

Compress/Uncomp	press project	
Compress	0	
Source Name :		Browse
Desti. Name :		Browse
	Compressing	
Uncompress		
Source Name :	C:\EB8000v461\project\111.cmp	Browse
Desti. Name :	C:\Users\Tina\Desktop\111.mtp	Browse
	Uncompressing	
		Exit

After Uncompressing, click [Exit]. Step 4.

Printer					
	Type : None			•	

**Step 6.** After saving file, the versions later than EBPro V1.11 will show a warning dialog, prompting that the extension name will be changed from mtp to emtp.

**Step 7.** EBPro V1.11 will save mtp file as emtp file, which is different from EB8000 mtp file for distinguishing.

Note:

It is recommended to backup EB8000 project before converting. The EB8000 files opened by EBPro will not be able to be opened by EB8000 anymore.
