# Q.

## How to find a user-defined tag in an object

### settings dialog box?

After importing a large number of user-defined tags, finding one particular tag when setting an object can take a very long time. You can easily find a tag by the following method.

### Α.

Take *Rockwell EtherNet/IP (CompactLogix) – Free Tag Names* driver as an example:

- Step 1. In [System Parameter Settings] » [Device List], add the driver and import the CSV file of the tags.
- **Step 2.** In the object settings dialog box, click [Find] button in the tag list window.

enerai <u>Security</u> Comme Moo	r   Shape   Label   nt : de : Value -	Offset : 0
